Extension of the Waterworks. By Mr. Delassize:

LEVALTHENT OF WATERWORKS AND Panile Buildings, February 7, 1671. 3
To the City Council of New Orleans:
In accordance with resolution No. 683. Administration series, I advertised by ten days' notice in the official journal, for proposals to furnish engines, pumps, and other improvements in waterworks machinery, etc., and in response thereto received seven bids. I would respectfully request that the inclosed specifications and bids be printed for the information of the Council, and that action thereon be deferred until the next regular meeting.

L. T. DELASSIZE,
Administrator.

Mr. Bonzano moved that the reports be By Mr. Delassize: Mr. Bonzano moved that the reports be received, at the same time he would also move that further time be granted for bids. works was likely to involve a large outlay, and as bids would probably be sent in from all parts of the United States, he would move that the time for receiving bids be ex tended thirty or ninety days. Mr. Shaw expressed an opinion that the Council had no right to grant such an extension. They had advertised for bids which had been received and opened. The Council might reject any or all of these bids, but had no right to take advantage of these people, who had made their bids in good faith, by inviting further competition after the kids had been opened. He moved that the report be received and that the bids received be printed in the journal for general information. Mr. Delassize seconded the motion, which was carried. The bids and specifications were as fol-Specifications for machinery, engines, pipes, hydrants and water gates to be furnished the city of New Orleans, being the same referred to in published notice of January 26, 1871. the city of New Orleans, being the same referred to in published notice of January 26, 1871. First—Three complete sets of engines, pumps, and other machinery and material, as follows:

Second—Each set of machinery to consist of one double cylinder quarter crank condensing and non-condensing piston engine, cylinders thereof to be placed at right angle to each other and connected with the same crank, which may be run with either high or low pressure, with variable cut-off and automatic regulator to govern the speed of the engine according to the pressure and quantity of water required in the mains; all to be mounted on a heavy iron frame and finished in a workmannike and mechanical manner; also, the necessary piston pumps, not less than six in number, so arranged as to take suction at one-sixth of the stroke, thereby imparting a uniform flow of water through the mains; and, if necessary, boilers to furnish steam sufficient to drive the above described engine, and enable it to perform the duty hereinafter described; all shafting, gearing, pillow-blocks, bridge-trees, safety check and stop valves, for both water and steam connecting pipes and fitting; also don-leve engine or steam pump, for supplying boilers with water, and a boiler pump to be operated by the pumping engine; all to be set up, in complete working crier, on foundations and in building to be furnished by vided with self-acting valves to close the dations and in building to be infinished by said city. Third—Each set of pumps shall be provided with self-acting valves to close the apertures between the pumps, when not in use, and the mains; each set of pumps shall have a check valve in suction pipe at or near the pumps so arranged that either two, four or six may be run at the same time. Fourth—The above described set of machinery shall have power and capacity to pump directly into the mains ten millions

of gallons of water in twenty-four hours, and maintain a uniform pressure of water of forty-four pounds per square inch, and shall be of sufficient strength to withstand a test of one hundred and ten pounds per square inch.

Fifth—All cast-iron pipe shall be cast in dry sand vertically, in lengths of twelve feet each, and subjected to a hydrostate pressure of three hundred pounds per square inch, and when thoroughly cleaned and tested, shall be coated with "Smith's Patent Varnish," in accordance with the requirements of said patent.

Sixth—All water gates shall be of the most approved make, and warranted to withstand a hydrostatic pressure of three hundred pounds per square inch.

Seventh—All fire hydrants shall be of such length as may be required, and to be double cased, with either single or double discharge nozzles, and warranted to open and shut without vibration under one hundred pounds pressure of water per square inch.

Eighth—One complete set of machinery,

and shull without vibration under one hundred pounds pressure of white per square inch.

Eighth—One complete set of machinery, with all pipes, valves and hydrants necessary therefor, as hereableare described, shall be creeted by the fifteenth day of December, 1871, and tested as seen thereafter as practicable, and in the event of the successful working and satisfactory to the Council, of the first set of machinery and appartenances as provided for in the foregoing specifications, then the two remaining sets of machinery, pipes, valves and hydrants shall be commenced and completed within a reasonable time.

New Originals, February 6, 1871, 1600, 1, 7, 16 dasses, Administrator of Waker works and Public Endlarge.

Mr. A. T. Pelasons, Fabroary 3, 1871.

Hen, L. T. Pelasons, Almantanov et Waterworks and Pulson Buildings.

We will furnish the cast irea pipe and fire hydrants required in proposed extension of Waterworks, together or either in separately, conforming in every in specifications on the in your or co, and delivered in the city of New Ordana, at the following prices:

For castificat pipe, per not ten of 2000 pounds, \$257.

Three-inch fire hydrants, to connect with four-inch supply pipe, e.e., \$2.

Four-inch fire hydrants, to connect with four-inch supply pipe, e.e., \$2.

Four-inch four-inch supply pipe, accepted to the supply pipe, e.e., \$2.

Four-inch four-inch supply pipe, accepted to the connect with four-inch supply pipe, e.e., \$2.

Four-inch four-inch supply pipe, carie, \$2.

Four-inch four-inch supply pipe, carie, \$2.

Four-inch large size be hearle, fail sace of the connect with four-inch supply pipe and the connect with four-inch supply pipe.

each have the same power and capacity, and will be completed in one year there after. The first set will user one lundred and eighty thousand [Sits-Cut) dollars, including such patents as may be necessary to accomplish the service transied. The remaining two sets will cost one hundred and thirty thousand (\$1.2,000) dollars each. All water pipe required by year during the erection of said marchinery, not to exceed thirty included and marchinery, not to exceed thirty included in the said set of the per ten, with the usual allowance of five per cent for leak and spiggot. All water valves will be delivered daring same period at seven dollars her inch, from four to twelve-inch diameter, and all line hydrants at sixty dollars each.

Payment to be made in each for machinery as the work progresses, at the rate of twelve and a half per cent per month of the cost of as the work progresses, at the rate of twelve and a half per cent per mooth of the rest of said machinery, and for all other material to be paid for as delivered.

JAMES BELL, Su crintendent.

P. S. I inclose check No. 2.6, on Franklin Bank, for \$500, as forfeit, in accordance with requirement.

J. BELL. Symmittendent

Superintendent. New ORLEANS, February 6, 1871. . T. Delassite, Administrator of Waterworks and Public Buildings.

Mr. L. T. Deleasure. Administrator of Waterworks and Paule Buddings.

I propose to furnish the "engines, pumps and other improvements in waterworks machinery," intracordance with, and as described in specifications on file in your office, not including inlet and outlet water pipes, nor the hydrants and valves for water pipes, for the sum of one hundred and eighty-seven thousand five hundred dollars for each of three sets, the city waiving the privilege to take one orfthree sets; ten percent of which amount shall be paid on significant of the paid in equal monthly installments as the work progrekses and is ready for shipment; and the remaining fifty per cent of said ameunt to be paid on its final acceptance, after having been submitted to all tests, as specified. And for my ability to furnish said machinery as described therein I respectfully refer you to the Holly Manufacturing Company, of Lockport, New York, EDWIN E. CHUBBUCK.

Mr. L. T. belassire, Administrator of Waterworks and Public Buddings. Mr. I. T. Delassire, Administrator of Waterwork, and Public Buildings.

Mr. I. T. Belassire. Administrator of Waterworks and Public Boldings.
The undersigned, residents of and manufacturers in the city of Troy, in the State of New York, beg leave respectfully to tender the following proposition to farmish and deliver machinery, pipe valves, hydrants, etc., for the waterworks about to be created in and by the city of New Orleans, in pursuance of a printed notice to that effect, a copy of which is attached hereto.

We hereby propose to furnish, deliver and creet in said city of New Orleans pumping machinery of a capacity sufficient to furnish thirty millions of gallons of water in twenty-four hours, in strict accordance with each and every one of the conditions contained in the specifications for that purpose issued by and on file in your said Department of Waterworks, for the sum of five hundred

and five thousand dollars, which sum includes the royalty necessary to be paid by us for the use of the patents necessary to accomplish the objects contemplated in said specifications, on the following terms and conditions, to wit: The payment to us by said city of the sum of twenty thousand dollars per month for each and every month beginning on the first day of May, A. D. 1871, and continuing until the whole of said machinery shall be completed and erected and in working order; the balance of said five hundred and five thousand dollars to be paid by said city to us within sixty days from and after the erection of said machinery.

in working order, the busianed dollars to be paid by said city to us within sixty days from and after the erection of said machinery.

We hereby further propose to furnish and deliver to, and in said city of New Orleans, all the east-from water pipe required by said specifications at fifty-mne dollars and seventy-five cents \$59.75) per ten, with the usual allowance of five per cent for habs and spiggots, and for all special castings the sum of four and three-quarter cents per pound, delivered in said city.

We hereby further propose to furnish and deliver to and in said city all water valves required by said specifications, the same to be either single or double faced, and known and described as "Brown's patent sliding stop valves," which we hereby guarantee to be equal, if not superior, in principle, construction and action, to any known valves, and to be able to withstand any hydrostatic pressure that can ever be required of the same in connection with any system of waterworks, as follows, to wit All single faced valves, from four to twelve inches, inclusive, for the sum of sixty dollars and fifty cents (% 59) per inch all double-faced valves of the same dimensions for the sum of sixty ends (% 15) per inch all single-faced sixteen eighteen and itwenty inch valves at twelve dollars and fifty cents (% 15) per inch; all double-faced valves of the same dimensions of their v and thirty six inches at the rate of twenty-five (§ 5) dollars per lach.

We nereby arrither propose to furnish and deliver, as atoresaid, all fire hydrants required by said specifications, too same to the the hydrants known and described as "Brown's Pacent Hydrant or Fire Plug." of like construction as that is redoucted a face and all reble descharge paths to the mole to withstand a hydrostatic pressure of four handred pounds to the square inch, giving the full double discharge right on the sum of sixty dollars can.

We hereby tarther agree that in the event of an award of said contract to as to furnish a contract of an award of said contract

Mr. I. T. De sel e. Administrator of Waterwests and Pue to Buldings New Oranna, Louisana.

Sin-In compliance with your published netace of Junnary 10, and in necordance with specification on file in your ofner. I be rewith shound a proposition to furnish machinery, pumps, pipes, water gates and two multiple services of the supplying the city of New Orleans with water, indice the tholy system, as follows:

Later complete sets of engines, beliefs, paneps and other machinery, each set one setting of the condensing of the with R. Holly's batch training education, operated only the pressure of water in the mannary.

as to insure the test tradits both as to volume or were and diametrion of fractions then the showe described another with lave power and capacity to the water in either of the above electrons (without interfering with the ordinary supply of water for domestic use in such district) to the height of one handred feet. The city shall cause all fire legislants (except those used in making the test) in said district to be closed during the time of making such test.

The first set of machinery above described shall have power to throw twelve streams of water from mains and hydrauts to be laid in the Fourth District, without interfering with the domestic supply; or it shall have power to make a test on Canal street, by disconnecting the pipe in said street and leading to said street from other mains in the city, to throw eighten streams of water of one inch diameter to the height of 190 feet.

The price for the above described three sets of machinery, delivered and set up in complete working order, as above stated, is \$417,000.

complete working order, as allowe stated, is \$417,000.

The first set of said unchinery to be finished and set up complete, ready for use, on or before the first day of December, 1871, for the sam of \$123,000; ten per cent of which sum shall be paid on the first day of April next, and on the first day of April next, and on the first day of April next, and on the remaining thirty per cent shall be paid when the machinery is tested and found capable of pumping one-third of the quantity of water mentioned at the pressure above stated; but the city shall, prior to the time when either of said sets of machinery is completed, do what is provided for her to do, in order that such tests may be nade. Upon the successful testing of the first set of said machinery, the remaining two sets shall be commenced, and, within six moaths thereafter, shall be delivered and set up at the price and upon the terms of payment named above.

In connection therewith will be delivered, on reasonable notice, all the cast-iron mains required, from four to thirty-six nakes inside diameter, in lengths of twelve feet each, to be cast vertically in dry sand, and subjected to a hydrostatic pressure of 300 pounds per square inch, to be cameled inside and outside with "Smith's patent variation, and solices, and the sand outside with "Smith's patent variation, and solices, and the sand outside with "Smith's patent variation, and solices, and the sand outside with "Smith's patent variation, and solices, and the sand outside with "Smith's patent variation, and solices, and the sand outside with "Smith's patent variation, and solices, and seventy cents per lineal set and seventy cents per lineal set.

nish," as follows:
All four-inch, seventy cents per lineal

set.
All six-inch, \$1 68 per lineal foot.
All sight-inch, \$1 40 per lineal foot,
All ten-inch, \$2 50 per lineal foot.
All ten-ve-inch, \$3 per lineal foot.
All sixteen-inch, \$5 40 per lineal foot.
All sixteen-inch, \$6 50 per lineal foot.
All tenty-inch, \$6 50 per lineal foot.
All twenty-four-inch, \$8 90 per lineal foot.
All twenty-four-inch, \$8 90 per lineal foot.

All thirty-inch. \$11 per lineal foot.
All thirty-six-inch, \$16 10 per lineal foot.
Also, all special castings necessary to lay said pipe, and make connections at intersections of streets, as well as with fire

hydrants, consisting of crossings, ties, ells, bends, reducers and dead-end plags, shall be delivered at four and one-half cents per pound. Also, all water gates or valves, of the best make, guaranteed to stand three handred pounds pressure, per square inch, at the following rates:

All four-inch, \$28 each.
All six-inch, \$42 each.
All six-inch, \$42 each.
All ten-inch, \$20 each.
All thirty-inch, \$36 each.
All thirty-inch, \$200 each.
All six-inch, \$200 each.
All thirty-inch, \$200 each.
All thirty-six-inch, \$200 each.
All thirty-six-inch, \$200 each.
All thirty-six-inch, \$600.

Together with all fire hydrants necessary to replace those now in use, as well as for the contemplated extension of water mains; said hydrants to be either single or double discharge, double cased, and warranted to withstand the high pressure of water an the mains, and to open and close under sind pressure without vibration, as follows: All single discharge hydrants, \$50.

In addition to furnishing the above materials, I will also lay the pipe and special castings, set all water gates and tire hydrants throughout the Fourth and Sixth Districts (the city causing the treaches to be opened), furnishing all lead and other material necessary therefor, and guaranteeing all pipes and joints to withstand the pressure required, at the following rates per incal foot for the various sized pipe, as follows:
All four-inch, 15½ cents per foot.

inneal foot for the various sized paper, allows:
All cighteen inch, 51 38 per foot.
All cighteen inch, 51 38 per foot.
All six-inch, 23 cents per foot.
All six-inch, 23 cents per foot.
All twenty-inch, 51 50 per foot.
All tempty-inch, 51 be per foot.
All tempty-inch, 50 cents per foot.
All thirty-inch, 52 50 per foot.
All thirty-inch, 52 50 per foot.
All thirty-inch, 53 50 per foot.
All six-inch, 53 50 per foot.
All six-inch six-inch, 51 31 per foot.
All special custings, three-foorths of, per pound.
All four six, eight and ten-inch visit 50 cach.

The above proposition is respectfully sub-matted as an entirety.

T. W. YARDLEY. Reports from Administrators.
By Mr. Walton:

Decouvers to Proceeding to the Section of the Secti

To the Cry Connected New Orleans T. N. I have appointed Mr. J. M. Carrie collector of discusses for persons not resision and having no place of business, under section fitty nine of ordinance number ray hundred made seventy-one, at a compensation of tential seventy upon the amount collected which I respectfully ask the Council to ratify

JOHN S. WALTON, Administrator. Received and approved.

By Mr. West:

President of Indianages

[contact 1, 27]

To the Cir. Connell of New Orients. In 18th Cir. Connell of New Orients.

The undersigned respectfully submits the following bids received in answer to the advertisement inviting "proposals for brick banquettes, with stone curies and wooden gutters, on the northwast side of Broad stoet, between Canal and Bienville streets. Also, on the northwest side of Customhouse street, between Broad and White streets. Nicholas Connell bids \$3.25 per running to t, complete; William Cullium bids \$4.15 per running foot, complete; and the bid of Nicholas Connell being the lowest, it is recommended that the accompanying resonation be adopted, adjudicating the contract to and accepting the scentity effected by said Connell.

Besideed, That the proposal of Nicholas

Connell.

J. R. WEST.
Administrator.

Resolved, That the proposal of Nicholas Connell for making brick banquettes, with some curies and wooden guiters, on the northeast side of Broad street, between Canal and Beinville streets; also, brick banquettes, with stone cmiss and wooden gutters, on the northwest side of Custominous extrect, between Broad and White streets, at three dollars and twenty-five cints per running foot, complete, and effecting Christopher Council as security in the sum of two thousand five hundred dollars, be and the same is hereby accepted, and the Mayor authorized to enter into contract on liefalf of the city, per notarial act before the city notary, for the faithful petermance of said contract.

Adopted. Mr. West said he had a resolution to effer with reference to the Metropolitan Police, and he would ask the Council to

c usent to its passage. It was as follows:
Wittmass. The Council of the city have been invited by the committees or delegations of the parish of Orleans in the General Assembly, to make such suggestions in the form of legislative acts as may be for interest and benefit of the city of New Orleans:

Resolved. That the following bill be a commended and indorsed by the Council as embracing its suggestions relative to the government of police within this parish, and the settlement of Metropolitan Police delines.

An act to provide for the regulation and gov-ernment of the police of the city of New Orleans, to abolish the Board of Commis-sioners of Metropolitan Police, and to pro-vide for the settlement-of Metropolitan Police warrants not otherwise provided for

SECTION 1. Be it enacted by the Senate and House of Representatives of the State of Louisiana, in General Assembly con-vened, That the Board of Commissioners of Metropolitan Police be and the same is hereby abolished.

vened, That the Board of Commissioners of Metropolitan Police be and the same is heroby abolished.

Sec. 2. Be it further emacted, etc., That the control and regulation of the police of the parish of Orleans shall be vested in the Council of the city of New Orleans, with such restrictions and under such conditions as are hereinafter expressed.

Sec. 3. Be it further enacted, etc., That all taxes for police purposes heretofore assessed, and not collected at the time of the passage of this act, shall be collected as prescribed by law, and credited to the account of police by the Administrator of Finance; that the amounts so credited shall be paid out for the police expenses of the current year, 1871, and for the payment of Metropolitan Police warrants for expenses heretofore issued and unpaid; provided, that no holder of any warrant fraudulently, erroneously, or illegally issued or altered, shall hereby become entitled to payment. The parishes of Orleans, deferson and St. Bernard shall redeem all Metropolitan Police warrants broperly issued for pelice expenses within said respective parishes, and their proportion of general warrants tor the whole Metropolitan District, up to the amount so properly issued or expended; and any amount outstanding in excess thereof, representing any defalcation in the treasury of the Metropolitan Police Board shall become a debt of the State, payable out of the treasury, out of any noneys not otherwise appropriated, and the necessary amount is hereby appropriated therefor; and the Auditor of Public Accounts of the State, the Administrator of Finance of the parish of Jefferson, and one person for the parish of Jefferson, and one person for the parish of Jefferson and one person for the parish of St. Bernard, to be appointed by the Governor, shall form a commission, of which
