MANHATTAN WATER-WORKS.

The President and Directors of the MANHATTAN COMPANY have resolved the following regulations :—

1. Subscribers for water shall not supply families or persons with Manhattan water, but use it for their own families living on the premises, where it is taken. A reward of three dollars will be paid at the Water-Office, No 7 Reed street, for sufficient proof of convicting for this offence.

2. No lateral pipe shall be connected to the main or pipes of conduit without being authorised by the contractor.

3. Persons removing to houses which are supplied with water, will please to give notice at the Water-Office if they wish the supply continued, otherwise they will be charged as the premises were formerly.

4. The price for supplying houses will be as formerly, for private families, viz.—1 to 3 fire places 5 dollars, and 1 dollar 25 cents for each additional fire-place more than that number. If there is more than one family, the additional price of 3 dollars will be added. Grocers, as usual, ten dollars. Boarding-houses, Taverns, Eating-houses and manufactories according to private agreement.

5. Payment to be made as usual, half-yearly in advance.

6. The Company warrant a constant supply of water in their pipes of conduit, but not in the lateral pipes, therefore no deduction will be made for freezing or for the bad order of the lateral pipes, as they are the property of the occupants, or proprietors of the premises, and are by them to be kept in repair.

If accidents happen to the Water-works, public notice will be given, and a proper deduction made accordingly.

By the erection of new additional Works, the Company are enabled to give a more permanent and abundant supply, and the inhabitants are requested to keep their lateral pipes from leaking.

FRANCIS HUGUET,
Contractor for the Water works.
