

VILLAGE AQUEDUCT.

Our readers in the village are referred to a notice of Judge Walton in a subsequent column of this paper. It will be perceived from the statement of Judge W. that his receipts have been insufficient to warrant a continuance of the aqueduct at his own expense, without some new arrangement. The meeting which he proposed for last Saturday, was postponed to Saturday next, at the request of one or two citizens. Those who wish to have the aqueduct continued, will see the importance of attending this meeting ; as a failure in effecting a different arrangement will be followed by a discontinuance of our usual supply of water, after the 10th inst. Added to this, we understand Judge Walton has an offer for the sale of the dam and water privileges, which are now used in forcing the water into the village ; and which he will probably accept, should not a satisfactory plan for future operations be adopted at the proposed meeting.
