**EARTHEN WATER PIPE.**—This kind of pipe is now becoming known, and quite extensively used, to convey water under ground. So far as heard from, it has given perfect satisfaction, and been found to answer the purpose admirably. The cost of the pipe makes it the cheapest and best pipe used; and being made by machinery of the most perfect construction, it will make handsome joints and finished work. About one mile of this pipe has been used in Suisun City. It is also used extensively in Sacramento. About 1500 feet was purchased for Auburn. The Stockton Asylum use it extensively to convey water. Maj. Hensley, of San Jose has engaged 4000 feet for water piping, and Judge Bliss, of Marysville, about 1500 feet.—*Cal. Farmer.*
